

2 Weeks to Re-Review Enormous IP Matter: International Telecommunications Company

MASS AUTO REVIEW SOLUTION COMPLETES 11 MILLION PAGES IN 8 DAYS, SAVING OVER \$2M

The only thing harder than having to live through a 6-month document review with dozens of outsourced contract attorneys is having to do it all *again!*

That's exactly what this international telecommunications giant faced when the judge told counsel to reduce 80+ document requests to 10 and start over! That meant a complete re-dux of their first pass review effort – one that took over 6 months and many millions of dollars to complete. With only 2 weeks to go, this client looked to Valora to automate the responsiveness assessment using intelligence-guided software.

With twelve 1.5-hour software runs over an 8-day period, Valora quickly assessed the document requests, built a custom-configured rules engine and repeatedly crawled the client's data in a matter of hours.

In close consultation with both outside and inside counsel, the Valora team produced 40% fewer documents in under 2 weeks, meeting the judge's strict deadline with ease. But the best part for the client was the *\$2M+ in savings* compared to outsourced contract attorney review – now that's a savings worth calling your friends about !
