VALORA TECHNOLOGIES STRENGTHENS CORE ENGINEERING TEAM WITH KEY NEW HIRES

Industry Veterans Mary Vogt and Scott Mackey Drive PowerHouse^{TM} Software Development
for Rapidly Growing AutoClassification Firm

BEDFORD, MA – June 30, 2017 – Valora Technologies, Inc., a world-class provider of AutoClassification, Data Analytics and Machine Learning technologies for the Legal, Records Management & Information Governance markets, today announced two key appointments to its expanding Core Engineering Team. Mary Vogt and Scott Mackey join Aaron Goodisman, Valora's Chief Technology Officer, and the rest of the Valora Engineering team, with specific focus on building out the company's PowerHouse^{TM} and BlackCat^{TM} AutoClassification and Data Visualization products.

Mary Vogt serves as Senior Software Engineer, with a 20-year background in enterprise document management and web services. She previously worked directly with Mr. Goodisman at SilverStream Software (now MicroFocus), as well as prior engagements with Lotus, FileNet, and as as an independent software consultant. Mr. Goodisman and Ms. Vogt studied together as undergraduates at the Massachusetts Institute of Technology (MIT) and Ms. Vogt also holds a Master's Degree from Simmons College.

Scott Mackey joins the team most recently from Dell EMC, with previous experience in analytics and full-stack Java development at iRobot, General Dynamics, and other leading Massachusetts technology firms. With 10 years of Java-based development expertise, his background in REST APIs and both Java- and web-based UI design is ideally suited to Valora's work in enterprise-scale AutoClassification. He holds Bachelor's and Master's degrees in Computer Science from the University of Colorado.

"This is pretty much the technology dream team," remarked Sandra Serkes, Valora's President & CEO. "We are lucky to draw such outstanding individuals in this very tight labor pool for engineering talent. I think that's a testament to Valora's market promise and our solid technology stack."

Valora will continue adding to its Engineering group throughout the year, capitalizing on its recent investment from DTI Global.

 "I'm thrilled to welcome Mary and Scott to the Valora team," said Valora CTO Aaron Goodisman. "We have a lot of exciting ideas for moving the product suite forward and this group is uniquely qualified to implement them."

About Valora Technologies, Inc.
Valora is a world-class provider of AutoClassification, Data Analytics and Machine Learning technologies for the Legal, Records Management & Information Governance markets. We offer data mining, analytics, coding and review, document intake and visualization, and hosted solutions for corporations & government agencies, as well as their advisory, inside & outside counsel organizations around the world.

Valora has developed a strong expertise in the processing, management & analysis of large and small matters with complex requirements, such as short deadlines, sensitive material & mixed languages. Our specialty is providing efficiency, organization and cost control.
