

Legalweek NEW YORK

January 29 - February 1, 2018

Take the Express to Where Legal Business Gets Done

Valora to Demo PowerHouse & BlackCat AutoClassification at LegalWeek 2018

Join us at LegalWeek New York where Valora will be demonstrating File AutoClassification for ROT, Retention, Legal Hold, AutoRedaction, PII detection and much, much more! See our PowerHouse processing engine and BlackCat data visualization platform live on display at the Epiq Demo Suite at LegalTech. Come see a live demonstration of:

- **Detailed Metadata Creation** for all types of files. Watch as files automatically classify by Document Type, Date, Custodian/Author, Topics & Keywords, Product and Brand Names, and Geographical information
- **Automatic Retention Disposition.** See software algorithms automatically determine retention period and disposition handling upon expiration
- **ROT and Legal Hold detection.** Which files can be defensibly removed? Which need to move to Legal Hold? What to do with everything in between?
- **Dashboard and Graphics Representation** of document populations. See point & click data mining and easy display of dozens of attribute fields.
- **Migrate files** in bulk or singly, based on attribute data. Hands-on demo of the Valora PowerHouse Rules Engine

To make an appointment, please email Anna Swanson at Valora (aswanson@valoratech.com).
