

FOR IMMEDIATE RELEASE

Steve Weissman Joins Valora Technologies as Senior Project Manager & Information Governance Expert

“The InfoGov Guy™” Joins AutoClassification Technology Provider

BEDFORD, MA – February 18, 2020 – Leading AutoClassification technology provider Valora Technologies announced today the appointment of Steve Weissman as Senior Project Manager & Information Governance Expert. In his role, Steve will lead large and complex client enterprise governance projects for Valora Technologies clients globally.

Prior to joining Valora Technologies, Steve was Principal Consultant at Holly Group and Co-Founder of the Information Coalition (now merged with ARMA). He is an expert consultant, trainer, and public speaker who leverages a proven proprietary methodology to optimize information management strategies for clients – from strategic planning and needs assessment to vendor selection and user adoption. Also known as “The InfoGov Guy™,” Steve has over 20 years experience of helping businesses manage, leverage and protect business-critical information.

“We are very excited to have Steve join our team,” said Sandra Serkes, Chief Executive Officer of Valora Technologies. “I am confident that Steve’s experience, industry knowledge and thoughtful approach to enterprise Information Governance will contribute to the future success of Valora Technologies and its clients.”

“As an information consultant for the past 25 years, I’ve often recommended that clients use file analysis software to better understand what information they have and what they should do with it – both for standalone projects and on an ongoing basis,” said Steve Weissman. “Valora’s sophisticated technology suite is especially good at this. In my new role I will have opportunities to incorporate these solutions with my approach and best practices, so it’s a great fit!”

About Valora Technologies

Valora Technologies, Inc. is a leading provider of AutoClassification technology that helps solve corporate Enterprise Content Management and Information Governance challenges. Through a combination of proven methodology, industry best practices and its powerful technology platform, Valora enables organizations to leverage flexible and scalable enterprise-wide management of AutoClassification, data mining, rich metadata application and strategies, content analytics, document intake and visualization, and document lifecycle management in some of the most complex data environments in the world.
