Shift Towards AI-Ready Data

Enterprise Data Strategy

- Convergence of:
 - Records,
 - Information Governance &
 - Enterprise Data Strategy
- Data governance changing as AI is embedded everywhere?

Bad Data = Bad Models

Data Quality

- How to support reliable, responsible AI with the data you have today?
- Do leaders understand the downstream risks of poor data quality?

AutoClassification's Role

Scalable, Defensible Governance

- AutoClassification's role in creating AI-ready data
- What can automation do better than traditional review teams?
- Do we still need humans?

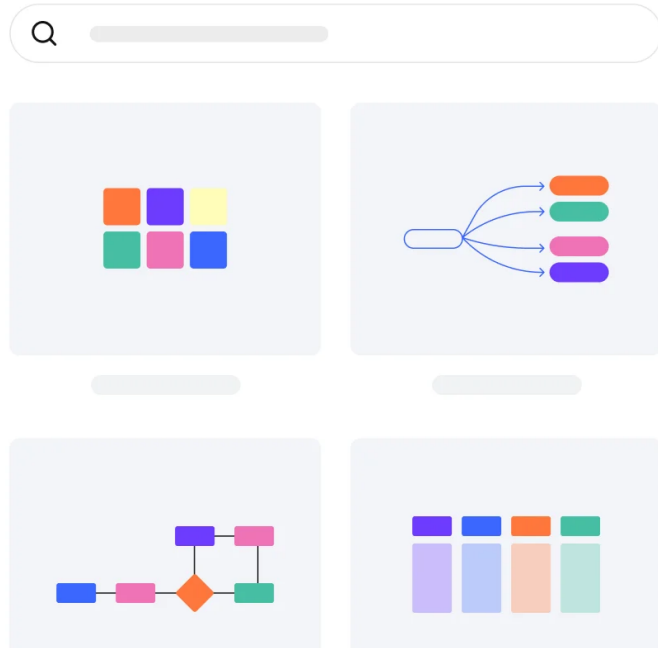

Humans + Machines

Workforce Transformation

- Threaten roles or create opportunities?
- What skills will people need?
- Can AI help reduce ageism or skill-gap barriers in the workplace?

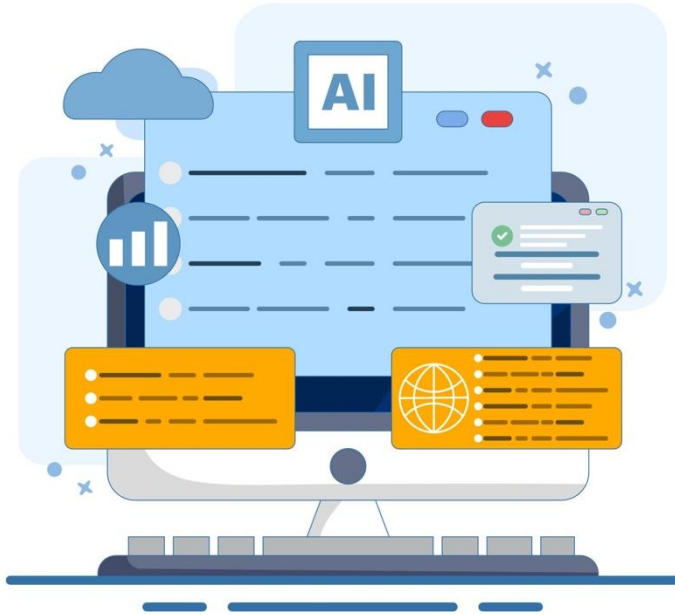

Workflow Re-Imagining vs. Simple Automation

Re-Imagining Workflows

- What's the risk of just automating a bad process?
- How do IG leaders help shift the organizational mindset toward redesign rather than replication?

2026 Trends

AI Everywhere

- What does this mean for data governance leaders?
- Does this make governance easier or more complex?
- How to prepare for AI that is 'always on' across their systems?

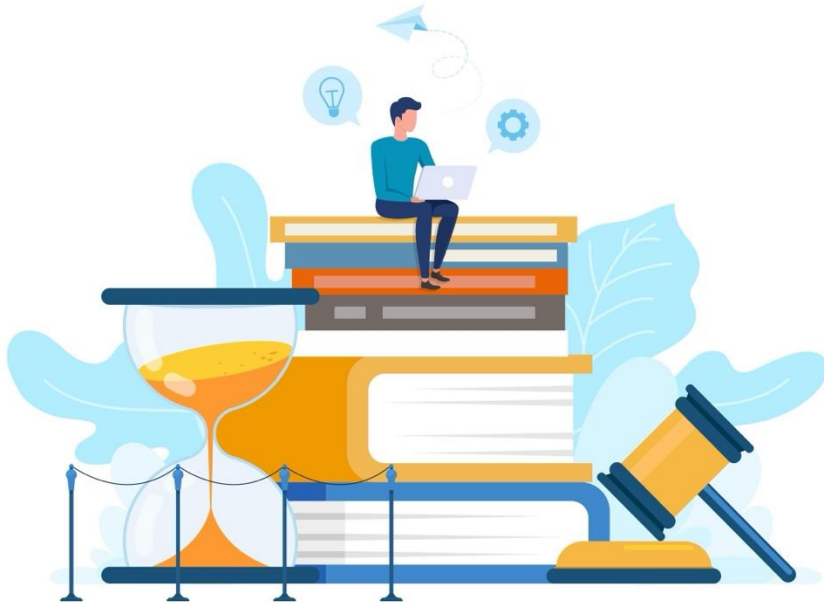

AI Principles & Risk Frameworks

Responsible Automation

- Practical vs. aspirational?
- How do governance teams reconcile innovation with caution?
- Are organizations overestimating or underestimating AI risk?

Policy, Technology & Social Responsibility

Alignment or Tension?

- How do leaders navigate?
- Does governance need to change its approach as automation becomes more intelligent?
- How do you ensure accountability when machines are making or influencing decisions?

Modern Information Governance in 2026

Final Thoughts

- What does modern IG look like in 2026??
- What's one capability organizations absolutely must invest in?
- What mindset shift is most important?
